

GitHub 简介

2024.04

Git is a **free and open source** distributed version control system designed to handle everything from small to very large projects with speed and efficiency.

Git is **easy to learn** and has a **tiny footprint with lightning fast performance**. It outclasses SCM tools like Subversion, CVS, Perforce, and ClearCase with features like **cheap local branching**, convenient **staging areas**, and **multiple workflows**.

I love open source ❤️

I got into open source in 2012. Two years later, I quit my office job to work on open source full-time while living off savings. I have been doing that for more than [6 years](#) now. Since 2018, my open source work has been funded by the awesome community.

If you or your company use any of my projects or like what I'm doing, please consider backing me so I can continue maintaining and evolving all my projects and new ones. I'm in this for the long run.

I actively maintain [1100+ npm packages](#) ([2 billion downloads a month](#)) and [many popular projects](#). You're probably depending on some of my packages in your dependency tree. For example, Webpack ([proof](#)) and Babel ([proof](#)) rely on 100+ of my packages. Many [large companies](#) also rely on my packages.

You can read more about me in [this](#) and [this](#) interview.

Thank you for your support! 🙏

No gambling companies please.

题外

- 趣事
 - 除了 PJ 之外, 其他两位创始人都是大学辍学
 - 三个人凑了几百美金开始, 在 a16z 投资前, 一直是赢利的
 - Preston-Werner 此前做过 Gravatar 并卖给 Automattic
 - 在 GitHub 之前, Hyett 和 Wanstrath 考虑做 FamSpam: 允许大家庭之间沟通的邮件列表
- 创始人的话
 - We both loved git but there was no acceptable way to share code with others.
 - And we're all about getting things done. We're very lucky to be working (mostly) on a web app, which means it's super easy to make changes fast. We've learned it's much better to ship it now and fix it later, once you can see how people are using it, than it is to let it linger in development forever. Just ship it.
 - Worry about every dollar you spend before (and even after) you're profitable. Focus on the things that matter and don't waste time endlessly redesigning your site or tinkering with new technologies. There'll be plenty of time for that later.
